

MULTI SIZE CONICAL SHRINKING PIPE PLUGS WITH AND WITHOUT BYPASS 1 BAR

The conical shrinking Pipe Plugs are made with a new type of chloroprene and aramid fabric rubber, reinforced with hot vulcanized rubber and they are more versatile than conventional pipe plugs because of their flexible inflatable structure. Available in a variety of sizes that covers a broader range of pipe diameters than most pipe plugs. This type of shrinking pipe plugs allows to sealing off non-symmetrical pipe cross sections and an easy access through small manholes
